General Information

The Department of Homeland Security (DHS) has [announced](#) additions to the list of Classification of Instructional Program (CIP) codes that are DHS-approved for the 17-month extension originally cited in the April 2008, DHS interim final rule (IFR). This IFR extended by 17 months the period of optional practical training (OPT) for a postsecondary student who graduates with a science, technology, engineering or mathematics (STEM) degree (*73 FR 18944*). The IFR authorized application for a 17-month extension of the 12-month OPT period for any nonimmigrant student who has graduated with a degree in a program of study in a subject with a CIP code that is DHS-approved for the extension.

Because of the dynamic nature of STEM-related education and training, DHS continues to review emerging fields for possible inclusion in the list of eligible STEM degree programs. As a result of its latest review, DHS is adding to the list of degree programs with CIP codes ending in “99” for certain CIP code families. Though the supplementary information associated with the 2008 regulation states that such “99” codes are not eligible STEM-designated degrees, DHS is now proposing that “99” codes be eligible STEM degree programs – but only those where every other degree in the immediate CIP code family qualifies as an eligible STEM field. DHS has found, since the publication of the 2008 regulation, that students in new and important STEM degree programs in emerging fields classified under “99” CIP codes have not been able to take advantage of the OPT extension. DHS believes that allowing students in such emerging fields to be eligible for OPT extension is in the national interest and should be encouraged.

The chart below is the second revision to the April 2008 list. All highlighted degree programs and CIP codes are now eligible for the 17-month extension of OPT.
